Framework: Laravel, Spring Boot, ASP.NET

Backend: RESTful APIs, JWT, MVC Architecture, MVVM, Authentication & Authorization

Frontend: Tailwind CSS, Bootstrap, Responsive

Database: MySQL, MariaDB, SQL Server, Firebase

Version Control: Git, GitHub

PROJECT

Online Programming Learning Software | 12/2024 - 4/2025

- **Team site:** 3 members.
- **Role:** Backend Developer
- **Link Github:** <https://github.com/minhvuongle2004/WebHocLapTrinh>
- **Description:** A full-featured e-learning web application for programming courses with video-based lessons. Key features include course and lesson management, student enrollment system, wishlist functionality, AI-powered chatbot support, personalized learning roadmaps, role-based authentication for admin and users, online payment processing, and analytics dashboard for tracking enrollments and revenue.
- **Backend:** Laravel 11, PHP 8.2.
- **Database:** MySQL.
- **Third-party Integration:** Google Drive API, VNPAY Gateway, BotMan Chatbot.
- **Frontend:** HTML5, CSS3, JavaScript, Bootstrap, Blade Template Engine.

VHBTB HomeCare | 8/2025 - 10/2025

- **Team size:** 3 members.
- **Role:** Backend Developer
- **Link Github:** <https://github.com/TranViet0908/VHBTB-HomeCare>
- **Description:** A full-stack home services marketplace platform connecting customers with service vendors, featuring AI-powered chatbot for customer support, integrated payment gateway processing, and multi-role authentication system. Implements advanced coupon management with flexible discount strategies, vendor application approval workflow, real-time shopping cart, and comprehensive review & rating system with automated calculations.
- **Backend:** Spring Boot 3.5.3, Java 21, Spring Security, Spring Data JPA, Maven
- **Database:** MySQL.
- **Third-party Integration:** Google Gemini API, VNPAY Payment Gateway, Apache PDFBox
- **Frontend:** Thymeleaf, Tailwind CSS, JavaScript, HTML5/CSS3

TechMart E-Commerce Platform | 8/2025 - 10/2025

- **Team size:** 1 members.
- **Role:** Fullstack Developer
- **Link Github:** <https://github.com/minhvuongle2004/electronic-store>
- **Description:** A full-featured online marketplace with integrated payment gateway, advanced promotion system supporting percentage and fixed discounts, and comprehensive order management. Features include automated email verification, real-time payment status tracking, user wishlist, and admin dashboard with analytics for managing products, orders, and customer accounts.
- **Backend:** Spring Boot 3.2.0, Spring Security, JWT Authentication, Java 21
- **Frontend:** Thymeleaf Template Engine, Bootstrap, JavaScript
- **Database:** MySQL 8.0
- **Third-party:** MoMo Payment Gateway, Gmail SMTP Service
